FOR INFORMATION ABOUT OUR OUR AIMS AND OUR PROJECTS

Digital skills needs amongst historians

Discussion with Professor Jane Winter

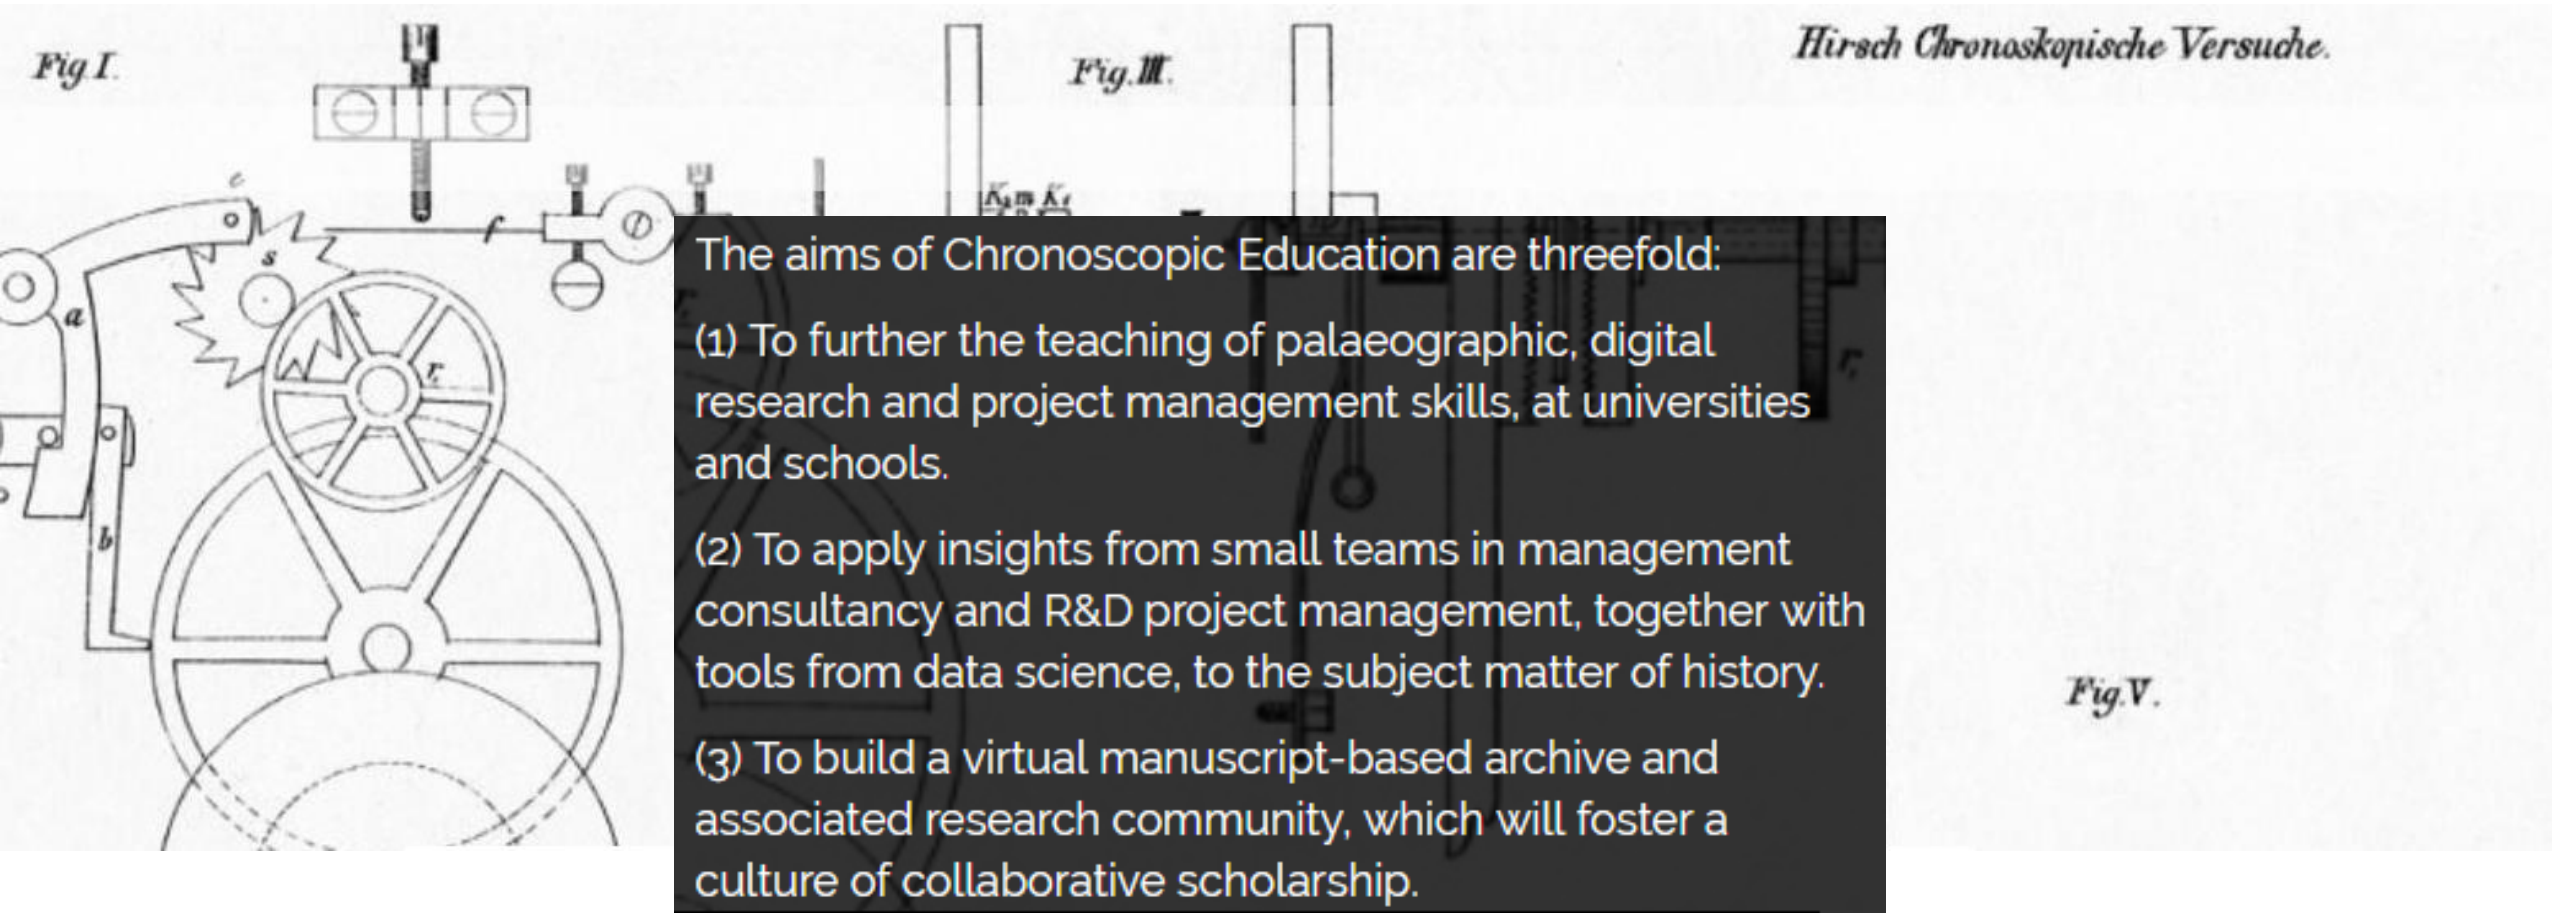

Colin Greenstreet

Wednesday, July 25th 2018

Discussion topics

- Current state of digital training for historians in higher education
- Anticipated skill needs in next five years
 - To meet changing needs of non-academic employment market
 - To ensure requisite skills for funded PhDs and post-docs
 - To ensure requisite skills for junior academic positions in history
- Chronoscopic Education vision for digital training
 - Integrating concepts, data, tools and coding
 - Integrating academia with GLAM & public history
 - Using MarineLives, Signs of Literacy, SOLM-2018, Glossary & Gazetteer content
 - Using facilitated small teams
 - Data management, database design, semantic annotation, wikidata, linked open data, image extraction
 - Project management, GitHub

Our social aims

MarineLives

Maphackathon

Signs of Literacy

SOLM-2018

EM Textiles, Garments & Dyestuffs Glossary

EM Maritime & Mercantile Gazetteer

Signs of Literacy Kaggle Research Competition, Nov 2018 – Jan 2019

Google owned Kaggle has selected us as one of a small number of pro bono competitions they support each year on the merits of our proposal, and the potential impact on the research field and community of the competition.

Kaggle will cover the running costs of the competition. We will provide the prize pool, and are now seeking to raise US \$30,000 from potential sponsors and partners.

The Proof of Concept will contain two parts:

- (1) Algorithmic identification of markes, initials and signatures.
- (2) Algorithmic discrimination between degrees of "sophistication" within the three categories of "marke"; "initial(s)", and "signature".

Having proven the concept, we will seek out an image or vision oriented computational laboratory with which to develop a grant funded collaboration to take the work further in 2019 and beyond.

Technical vision & role of the Kaggle competition

- Automatic identification of manuscript pages containing signoffs
- Markup of manuscript pages to isolate signoffs (markes, initials, signatures)
 - Hand markup of manuscript pages, but ideally automated markup
 - Signoffs can be single or multiple, for single or multiple depositions
 - Deponent signoffs; interpreter signoffs
- Automatic differentiation between classes of markes, initials and signatures
- Automatic differentiation within each class as to sophistication of execution & other parameters as a surrogate for literacy
- Automatic identification of manuscript pages containing deponent metadata (name; age; occupation; place of residence; date of deposition)
- Markup of manuscript pages to isolate deponent metadata
- Hand writing text recognition of deponent metadata and associate metadata with correct signoff

Signs of Literacy Kaggle Research Competition, Nov 2018 – Jan 2019

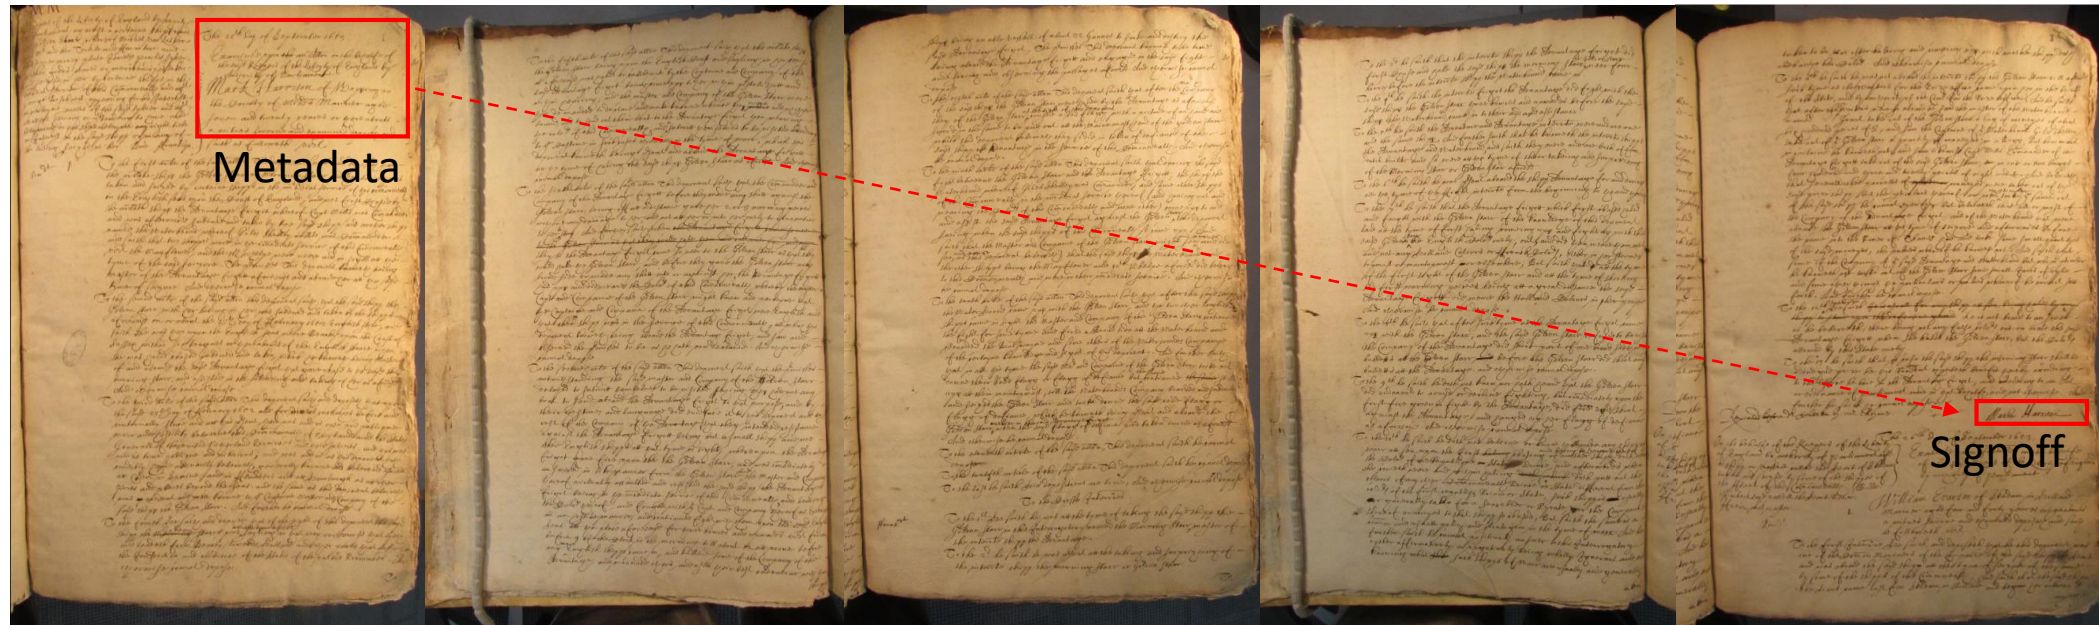

SOLM-2018: Signs of Literacy data set of C17th signatures, marks and initials
Pixel dimensions of image snippets; all images available in Dropbox [n = 3085, 25/07/2018]

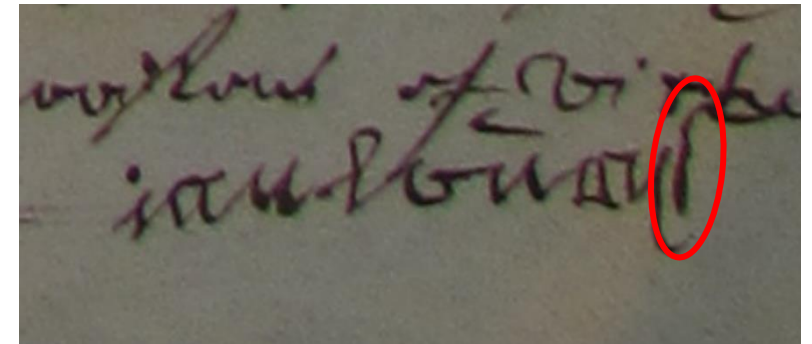

SUPPLEMENTARY MATERIAL

Legal deposition

Deposition of Mark Harrison; mariner and master; resident in Wapping, Middlesex; age 27;
Dated September 21st 1659 (TNA, HCA 13/68, ff. 1r-3r)

Physical characteristics of poorly executed signatures for machine detection – Part 1

Shaky straight lines and/or loops

Source: Clockwise from top LH side:

KaggleTestSnippet_HCA_1368_f.483v.PNG,
KaggleTestSnippet_HCA_1368_f.51v.PNG,
KaggleTestSnippet_HCA_1370_f.20v.PNG,
KaggleTestSnippet_HCA_1370_f.22r_Two,
KaggleTestSnippet_HCA_1370_f.168v.PNG

Physical characteristics of poorly executed signatures for machine detection – Part 2

Even London alderman & merchant, John Frederick, could smudge his signature, when signing an addendum to his deposition three weeks after the first deposition

Wolter Johansen signed a second deposition smudge free, whilst signing both times with capitals

Ink blots or smudges

Source: Clockwise from top LH side: KaggleTestSnippet_HCA_1371_f.503r.PNG, KaggleTestSnippet_HCA_1373_f.498v.PNG, KaggleTestSnippet_HCA_1368_f.59r.PNG, KaggleTestSnippet_HCA_1368_f.231r.PNG, KaggleTestSnippet_HCA_1368_f.239v.PNG, KaggleTestSnippet_HCA_1368_f.241v.PNG

Can machine detection distinguish blots, smudges, stylistic features, & deletions? (1)

Source: Clockwise from top LH side:
KaggleTestSnippet_HCA_1370_f.387v.PNG,
KaggleTestSnippet_HCA_1370_f.13r.PNG,
KaggleTestSnippet_HCA_1370_f.167r.PNG,
KaggleTestSnippet_HCA_1371_f.456r.PNG,
KaggleTestSnippet_HCA_1370_f.15r.PNG,
KaggleTestSnippet_HCA_1370_f.19r.PNG,
KaggleTestSnippet_HCA_1370_f.41v.PNG,
KaggleTestSnippet_HCA_1370_f.17v.PNG,

 Ink blots or smudges  Stylistic feature or smudge?  Deletion

We are looking for algorithms to detect “shake” in straight and curved lines

HYPOTHESIS: Shaky lines are a sign of poor signature execution (and by inference, poor handwriting execution) suggesting lower level of literacy than smooth executed lines

Shaky straight lines and/or loops

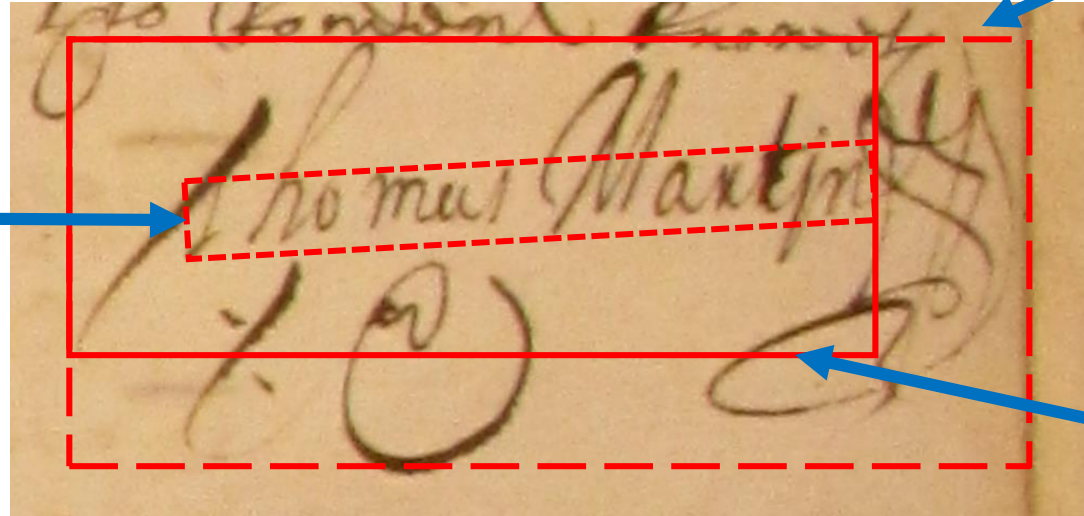

Clockwise, from top LH: KaggleTestSnippet_HCA_1371_f.435v.PNG, KaggleTestSnippet_HCA_1368_f.483v.PNG, KaggleTestSnippet_HCA_1368_f.483v_PIXELS.PNG, KaggleTestSnippet_HCA_1371_f.435v.PNG_PIXELS.PNG

Putting boundary boxes on C17th signatures

Boundary boxes marking the visual geometry of a signature

Inside boundary box, excluding uppers and downers

Outside boundary box, including flourish

Middle boundary box, including all letters, but excluding flourish

Statistics

Inside boundary box: 9.0 x 1.1

Middle boundary box: 9.75 x 4.25

Outside boundary box: 12.75 x 5.75

Rotation from horizontal: ca. 340 degrees

Different visual geometries of signatures

Challenge One: Identify the 11 image snippets on this page which contain signatures and highlight the 2 image snippets which contain signatures belonging to the same person

KaggleTestSnippet_HCA_1368_f.140r.PNG

KaggleTestSnippet_HCA_1368_f.142r.PNG

KaggleTestSnippet_HCA_1368_f.143r.PNG

KaggleTestSnippet_HCA_1368_f.145r.PNG

KaggleTestSnippet_HCA_1368_f.148r.PNG

KaggleTestSnippet_HCA_1368_f.150v.PNG

KaggleTestSnippet_HCA_1368_f.151v.PNG

KaggleTestSnippet_HCA_1368_f.153v.PNG

KaggleTestSnippet_HCA_1368_f.155r.PNG

KaggleTestSnippet_HCA_1368_f.156r.PNG

KaggleTestSnippet_HCA_1368_f.158r.PNG

KaggleTestSnippet_HCA_1368_f.159v.PNG

KaggleTestSnippet_HCA_1368_f.161v.PNG

Challenge Two: Detect a London based merchant, who has Dutch origin, from physical characteristics of signature, rather than spelling of name

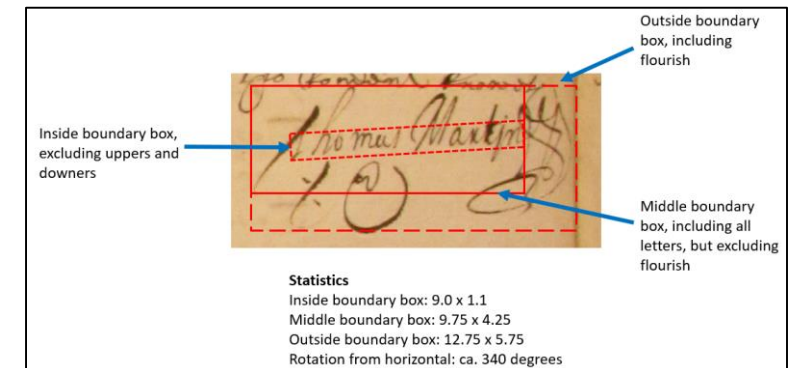

Semantic giveaways

- 3 names, not 2
- Specific names
["Cornelius"; "Vander";
"Hoene"]

Physical giveaways

- Long, narrow signature
- No flourish
- Limited capitalisation
- Middle bounding box close to inner bounding box

Research question - methodology: Can a machine distinguish between the authors of a specific initial?

Research question - methodology: Measuring pixel dimensions
