Our social aims

The aims of Chronoscopic Education are threefold:

(1) To further the teaching of palaeographic, digital research and project management skills, at universities and schools.

(2) To apply insights from small teams in management consultancy and R&D project management, together with tools from data science, to the subject matter of history.

(3) To build a virtual manuscript-based archive and associated research community, which will foster a culture of collaborative scholarship.

Signs of Literacy Kaggle Research Competition, Nov 2018 – Jan 2019

Signs of Literacy Kaggle Research Competition, 2018

Colin Greenstreet on LinkedIn

April 30, 2018

Google owned Kaggle has selected us as one of a small number of pro bono competitions they support each year on the merits of our proposal, and the potential impact on the research field and community of the competition.

Kaggle will cover the running costs of the competition. We will provide the prize pool, and are now seeking to raise US $30,000 from potential sponsors and partners.

The Proof of Concept will contain two parts:

(1) Algorithmic identification of markes, initials and signatures.

(2) Algorithmic discrimination between degrees of "sophistication" within the three categories of "marke"; "initial(s)", and "signature".

Having proven the concept, we will seek out an image or vision oriented computational laboratory with which to develop a grant funded collaboration to take the work further in 2019 and beyond.

Charitable incorporated organisation

From Wikipedia, the free encyclopedia

A **charitable incorporated organisation** (**CIO**) is a new form of legal entity designed for non-profit organisations in the United Kingdom.

The main intended benefits of the new entity are that it has legal personality, the ability to conduct business in its own name, and limited liability so that its members and trustees will not have to contribute in the event of financial loss. These are already available to limited companies; charities can be formed as companies, but then they must be registered with both Companies House and the Charity Commission. In contrast, the CIO only needs to register with the Charity Commission. This is expected to reduce bureaucracy for the charity.[1]

The CIO status became available to charities in England and Wales on 4 March 2013. In Scotland, the Office of the Scottish Charity Regulator began registering **Scottish Charitable Incorporated Organisations** (**SCIO**s) in April 2011.[2]
